

Surveillance Video over Powerline

Customer Overview

abc Academy is a private daycare that offers a fun, healthy and educational environment for young children. abc provides nurturing childcare in a state of the art facility. It aims to enrich the quality of family life by providing peace of mind to parents and enhancing the life experiences of the children in their care.

Customer Requirement

abc Academy wanted to enhance the level of valued added services provided to the parents by providing them with the ability to see their children throughout the day, while ensuring the web feed was secure and private.

VisualGate Systems Solution

abc spoke with VisualGate before renovating its facility and opted to install AC fixtures for the cameras rather than having to install many meters of video cabling throughout the centre. VisualGate Systems PL-VUE Powerline surveillance video solution allowed for easy installation of the cameras and DVR to the newly renovated childcare facilities by utilizing the AC wiring in the building to transmit the video signal. The cameras were installed in each classroom allowing each family the opportunity to log on through abc Academy's website and view their child through live video streaming at anytime and from anywhere.

"As a new private daycare, we wanted to provide the best possible services to the families who trusted us with their children. Through the video the children's parents are able to feel 'in touch' with their children throughout the day but best of all, the video helps more quickly build the trust fundamental to a productive relationship between parents and the daycare staff.

"abc Academy parents have overwhelmingly stated that the video gives them added peace of mind and great satisfaction when they need a "baby fix" throughout their days at work. They particularly appreciate the clarity of the image as it is easy for them to locate their child in the classroom. abc Academy has also had many positive comments from long distance grandparents of abc students from as far away as Israel who are able to feel more in touch with their grandchildren as a result of the video. It has been a great success." stated Wendy Arnold List, Owner of abc Academy.
